ABOUT

A fully certified Full-Stack Developer with knowledge in a range of programming languages & frameworks. A passionate coder who is constantly exploring new technologies & possibilities. Extensive experience compressed into a relatively short time span - a testament to an ability to comprehend & adopt complex development & evidence of a strong aptitude for coding. Hard technical skills coupled with a soft digital marketing skill set used during the high-level planning stage. Strong communication skills & professional experience resulting in the ability to explain complex products & concepts while also maintaining & developing client relationships.

PORTFOLIO

My portfolio is comprised of my personal professional website & four websites & applications which have served as the basis for assessment for my Full-Stack Developer qualification. The below is listed in descending order with my most recent projects displayed first.

420 points

WORK EXPERIENCE

For the purposes keeping this CV concise & relevant I have opted not to outline in detail each position I have held (I have been in continuous employment since graduation), however I would be happy to provide more information upon request. Please note I was working a variety of jobs in Australia from Sep '16 to Dec '17.

CLAIMS HANDLER/BROKER

DWF Claims | Feb 2018 - July 2019

- My role involved customer facing after sales support for a large brokerage firm. The role revolved around managing claims on behalf of clients & involved some elements of conflict resolution.
- As part of this role I chaired periodic claims review meetings with larger clients as well as attending & facilitating liability consultations & loss adjuster meetings.
- This role is also focused on assisting the brokers/account handlers with claims queries & building claims reports in conjunction with information obtained from both the insurers & the clients.

TECHNICAL ASSISTANT/UNDERWRITING ASSISTANT

Allied World Assurance Company | Nov 2014 - Aug 2016

- Part of the Operations Team which is tasked with providing support to underwriters working in the London Market. My specific line was SME which was the main focus of my role. This is a Professional Indemnity book containing Errors & Omissions & Directors & Officers cover. However part of my role has been to develop my knowledge of other lines or business & systems in order to assist my teammates during their busy periods or absences.
- Tasks included logging of submissions, liaising with claims to ensure a sufficient claims report is on file for renewals, maintenance of policy folders/records, conducting outstanding information/subjectivity chasers (claims reports, no claims declarations, etc), double checking the correct details have been bound, dealing with accounts queries, issuing & booking endorsements, reviewing quotes & entering the relevant details on our systems (Dragon & Genius), issuing policy documentation, maintenance & contra of manual Excel logs against internal system run reports, preparing folders for renewal policies, fact checking slips, & any ad hoc tasks the underwriters required.
